DETAILED ACTION

Double Patenting

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer <u>cannot</u> overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 7-27 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims of prior U.S. Patent No. 6,626,550 B2 as follows.

	24	and 24 of U. S. Patent No. 6,626,550 B2.

This is a double patenting rejection.

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-6 are rejected under the judicially created doctrine of double patenting over claims respective claims 1, 2, 5, 3, 6 and 4 of U. S. Patent No. 6,626,550 B2 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

Application/Control Number: 10/670,003

Art Unit: 2875

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows:

		- at least one light guide projection for
		fitting said light guide panel disposed on
		left and/or right side of said plate-shaped
		body; <u>Claim 1, lines 5-7</u>
		- the light guide projection having an upper
		surface, a lower surface, a first side
		surface disposed parallel to the left and/or
		right side of said plate- shaped body; a
		second side surface disposed adjacent
		the first side surface and remote from the
		light source, and a third side surface
		disposed adjacent to the first side surface
		and the light source; Claim 1, lines 7-14

Claims 2-6	Claims 2, 5, 3, 6	Claims 2, 5, 3, 6 and 4 of U. S. Patent No.

·		recited in respective claims 2, 5, 3, 6 and 4 of U.
_	respectively	S. Patent No. 6,626,550 B2.

It would be have been obvious to one of ordinary skill in the art at the time of the invention to meet the limitations of claims 1-6 of the instant application with the structural limitations included in respective claims 2, 5, 3, 6 and 4 of U. S. Patent No. 6,626,550 B2.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.
